

# Introduction

Every project has to be reliable, efficient, maintainable and extensible. In this module we will take a look at five general rules commonly known as best practices, learn how to split the workflow into multiple files using the Invoke Workflow Activity and show how to organize a process from start to finish.

## Requirements:

Previous modules should be completed.

## Things you will learn:

- How to use Invoke Workflow Activity
- How to organise your project in a clean and efficient way
